📍 Bengaluru, Karnataka

PROFILE

MCA student with basic knowledge of Python and Java programming. Interested in learning and developing web applications and software solutions. A quick learner, hardworking, and eager to build skills in emerging technologies.

EDUCATION

Seshadripuram College <i>Master of Computer Applications</i>	2024 – Present Bengaluru Cgpa : 8.23
Government Home Science College <i>Bachelor of Computer Applications</i>	2021 – 2024 Hassan Cgpa : 8.53
Mangalore PU College <i>PUC (EBACs)</i>	2019 – 2021 C R Patna Percentage : 93.66
Government High School Megalakeri <i>SSLC</i>	2019 C R Patna Percentage : 92.32

TECHNICAL SKILLS

- Python Programming (Basic Level)
- Java Programming (Basic Level)
- MySQL (Basic Level)

INTERPERSONAL SKILLS

Adaptability | Team Collaboration | Able to Manage Time

PROJECTS

Legitimate mail sender and flood attack detection to avoid cyber crime

Technologies: Java | MySQL

Anti-spam measures use both email content analysis and sender information to detect unsolicited emails. If spam can be identified using the sender's IP address or domain, it reduces the need for heavy content-based filtering. This study applies sender authentication to identify the original sender of forwarded emails and treats them as legitimate by placing them on an allow list. We further improve this allow-list method to reduce misclassification and verify its effectiveness using real email log data.

CERTIFICATES

Python for Data Science by NPTEL
Basics of python by Infosys Springboard
Data Analytics by NIIT Foundation
